

Do you like paper dictionaries or electronic dictionaries?

I prefer the paper dictionaries. You may say an electronic dictionary is more convenient, easy to use and light-weight, but I find that when I look up the new words in a paper dictionary and write them down on my notebook, I can remember better.

How will dictionaries change in the future?

For paper dictionaries, they probably will become lighter and easy to carry around. While electronic dictionaries might become more detailed and accurate.

What kinds of dictionaries have you used before?

I mainly used the bilingual dictionaries, like Advanced Oxford English-Chinese Dictionary or the Longman Dictionary. I also used some electronic dictionaries my teachers recommended. Each has its own advantages.
