
Describe a time that a piece of equipment was broken (such as TV)

You should say:

What the equipment was;

When the problem was

What you did after it was broken

And how you felt about it

I owned a silver oven toaster once.

A few months ago, I started having a few problems with it. First, the timer stopped working. Then the toaster stopped heating up altogether.

When it broke, I had to buy a new toaster. I had to save a little bit. While I was still saving money, I toasted my bread on a pan with butter. When I had enough money, I went to the mall to find a good replacement. There were a lot of different toasters, but I settled on a black one. It was the same brand as my old oven toaster. I bought it because it's a good brand.

I was annoyed when my old toaster broke. It meant I had to spend time watching my bread toast in a pan instead of just leaving it in a toaster. When I got my new one, I was eager to test it out because it had settings my old one didn't have.

Are you good at handling problems on your own?

Yes, I am quite good at handling problems on my own. Whenever I have a problem, I like to take some time to determine how that problem might be solved. Often there is more than one way to solve a problem.

其他观点

Yes, I'm. The best way to handle a problem is to evaluate it and then decide what actions can be taken to solve it. Before I ask someone else to help solve my problem or to provide advice on how to do so, I will try to solve the problem myself.

What are the common home appliances that people use these days?

Common home appliances include clothes washing and drying machines refrigerators, stoves, microwave ovens, and dishwashing machines. Almost all of these appliances, big and small, are designed to make our lives easier.

其他观点

Appliances such as electric heaters, electric fans, and air-conditioners are designed to make us more comfortable. Rice cookers, food blenders, coffeemakers, and toasters are all designed to make cooking easier and faster. Vacuum cleaners are designed to make cleaning easier and faster.

When an electronic item of yours does not work, would you repair it or buy a new one?

It would depend on the cost to repair the item. If the cost to repair the item is high, I would then consider the purchase of a new item instead of fixing the old one. Last time, my old TV didn't work, I simply just bought a new one.

其他观点

It depends. If I need a new hard-drive in my computer, that hard-drive and the cost to install it may be close to the cost to install it may be close to the cost of repair exceeds or is near the cost of a new item, then I would choose to purchase a new item to replace the damaged item.

What can people do to protect their equipment from technical problems?

People can protect their equipment from technical problems by using and maintaining this equipment as recommended. Although some technical problems are inevitable, people have the best chance to avoid these problems by following the instruction manual and using the items as directed.

其他观点

It is advisable to always keep any equipment clean and safe from elements that could damage it. As an example, if you have a mobile phone, you should make sure to keep it away from water and away from places where it will acquire lots of dust or dirt.

Do you think modern technology makes people lazier?

Modern technology does not necessarily make us lazier. We can use the extra time technology gives us to perform additional tasks.

其他观点

No, I don't think so. If I wash and dry my clothes with a washing machine and dryer, that will be a lot faster than if I performed the same task by hand. The extra time I gain in using the wash machine and dryer can then be used to perform other household tasks.
