And explain why you like this magazine

It's National Humanity History which is quite popular among students and adults. But it's only issued every two weeks, so I always read it at a slow pace, otherwise I will have to wait for the new one to come out.

I started reading it when was in the first year in senior high school. It was my Chinese teacher who recommended it to me. We often read it in our reading session.

It covers a wide range of topics and its content is various, including stories of famous people, travel notes, introductions to antique collections, current affairs, news, history, and so on.

I like it because, on the one hand. Am very interested in history and humanities. On the other hand, it broadens my horizon and provides an access for me to have a general idea of all kinds of fields. When I am reading it, I feel relieved and all my stress is gone. Sometimes I am inspired by the simple words and sentences for there is profound meaning lying in them.
