

**Do people in your country wear sunglasses?**

I think the majority of Chinese people do not wear sunglasses. It's probably because the sunlight doesn't hurt our eyes that much so it's not necessary to wear them all the time.

**Where can you buy sunglasses?**

If I want to buy sunglasses, I would go to a mall where there are a few glasses shops. I may consider shopping online for a pair of glasses, but going to a real store is a better choice.

**Do you like to wear sunglasses?**

I don't. I'm not used to this type of glasses even if wearing them may help me look cool and charming. I guess I might wear them when I get old as I don't want others to see the bags under my eyes.
