

**Do you like your high school?**

Yeah, I do. It's one of the best high schools in our city. The campus is beautiful, and our teachers were very patient and friendly. Even though life was hard back then, it was quite memorable.

**Which subject do you like or dislike most?**

I liked to learn geography most, because I'm interested in learning about the different countries and cultures. But I hated chemistry, which has a lot of complicated formulas.

**Do you still contact with your friends in high school?**

Yes, I had some really good friends from high school whom I still stay in touch with. Some of them go to the same city for university with me. When we go back to our hometown, we would have parents together.

**What's your high school like?**

It's bittersweet. I was really busy with schoolwork, so I had to study really late in the evening. But I often chatted with close friends during breaks and our teachers were very friendly.

**What happened on your first day of high school?**

I remember on the first day everybody in the class took turns to introduce themselves briefly. I was quite shy back then, but I met a few classmates that day who I am still friends with now.
