Describe a quiet place you found

You should say:

Where it is

When you found it

How you found it

How often you go there

What it is like

How you felt about the place

The quiet place I found is a small bookstore, which is located in the southern part of the city.

I found it by accident last month when i was shopping with my friends.

When we felt tired while shopping, we wanted to find a spot, like a cafe, to have a rest. We did find a cafe, and it turned out to be not only a cafe, because there was a book section on the second floor. We were very surprised and happy.

I got there almost every day since I found it, it was really a good place to stay and be alone.

This store is not large. It is dominated by the ecologically-enhanced glass for enough lightling. There are some plants inside and the indoor air quality is very good.

I really like this quiet place where I have access to a wide collection of books. The atmosphere is perfect for reading or meditating. I can drink coffee or listen to the music under the sunlight. I always feel comfortable and relaxed to be there.

Is it hard to find quiet places in cities?

Yes, it's kind of hard. Most places in the cities are filled with all kinds of noise, like from cars and construction sites. A quiet place sounds like a luxury thing.

Maybe some bookshops are relatively quiet.

其他观点

Yes, I think so. Unlike the countryside, cities are packed with people, so it's not easy to find quiet places, maybe only in some bookstores and coffee shops.

Why is it quieter in the countryside?

There are much fewer people in the countryside, so there are slso fewer human activities which cause noise. I guess that's why some people prefer to live in the country. You know, to enjoy the peace and quiet.

其他观点

In the countryside, there are fewer traffic, construction and other human activities going on. People generally lead a very simple and peaceful life. Most of the time, you can only hear the voice of nature.

How would you deal with noisy neighbours?

Firstly, I would talk to the neighbor in a polite and friendly way and see if he could keep it down. Then, if it doesn't get better, I would report it to the community council to see what they can do about it.

其他观点

I would first try to talk to the neighbor about it. If the situation doesn't get any better, I would report it to the property management office. I would move out if nothing works.

Do you think cities are much noisier than before?

Yes. More and more people are moving into the cities, so it's getting increasingly crowed. There are more cars on the road, more houses being built. Therefore, it's also noisier than the past.

其他观点

I think so. As an increasing number of people are moving to the cities, the traffic is getting ever busier, and there's more construction going on to accommodate these

people. As a result, it's much noisier.

Compared with young people, do old people tend to live in quiet places?

Yes. Older people have a more peaceful state of mind. They prefer to settle down somewhere quiet, like in the countryside. There they can do something relaxing such as drinking tea and gardening.

其他观点

Yes, older people feel tired and stressed more easily than young people. They need to stay away from the noise and live in a quiet environment in order to maintain a healthy and peaceful life.

They don't enjoy lively atmosphere unlike young people.
